About the Seminar

The upcoming seminar on integrating Indian Knowledge Systems and traditional wisdom with modern practices promises to be transformative for its society and the nation. Addressing the disparity between India's profound heritage and contemporary demands, the event seeks a culturally sensitive approach to education, healthcare, agriculture, and environmental sustainability. Its core objective is to revolutionize education by redefining curricula and methodologies to infuse Indian Knowledge Systems for a comprehensive and culturally enriched learning experience. Preservation of cultural heritage is a key outcome, with discussions highlighting insights from traditional practices. The seminar also spotlight intrtraditional knowledge as a source of inspiration for innovation and entrepreneurship, potentially fostering economic benefits and job creation. The seminar aims to influence policy formulation by providing practical recommendations for integrating traditional knowledge into education, healthcare, agriculture, and environmental policies. This alignment represents a unique opportunity to interweave traditional wisdom into contemporary society, enhancing the nation's educational, cultural, and environmental tapestry.

Objectives of the Seminar

- Explore the cultural relevance of traditional knowledge in education, aiming to develop culturally sensitive and inclusive pedagogical strategies.
- Provide a platform for interdisciplinary discussions, synthesizing insights from Education, Humanities, Social Science, Science, etc., and fostering a holistic understanding.
- Encourage the presentation and discussion of interdisciplinary research frameworks, bridging the gap between traditional knowledge and contemporary practices.
- Highlight research on the integration of traditional agricultural practices, environmental wisdom, and sustainable development to contribute to environmental science and sustainability.
- Showcase research on the integration of Ayurveda, Yoga, and traditional health practices, contributing to the field of holistic health.
